- City Limits
- Ponds
- Roads

- Sensitive Stream Segment:**
- Restorable Stream Segment:**
- Impacted Stream Segment:**

High quality streams with naturally occurring channels and heathy riparian zone.
 Good quality streams with only minor impacts observed in riparian zone.
 Stream quality and riparian zone reflect degradation. Restoration potential exists.
 Significant degradation indicated in stream and riparian zone. Riparian zone fragmented.
 Highly degraded stream and surrounding riparian zone. Riparian zone no longer functions to protect stream.
